

**The Project Management Experts®**

PM Solutions is a project management firm helping organizations govern, manage, and measure their portfolios to improve business performance.

Project Management Methodology Development

Organizations that have adopted a standard project management methodology have realized a 63% improvement* in delivering projects successfully. PM Solutions has contributed to project management methodology improvements for hundreds of clients internationally.

When implementing a project management methodology for your organization, PM Solutions factors in your existing management best practices. Implementation is a collaborative process, with final methodology ownership in your hands. Our methodology implementation approaches are designed to foster acceptance and make the adoption of a standard methodology welcomed within your project culture.

Methodology Development Services

PM Solutions begins by reviewing the project management and related methodologies you already have in place. We then identify areas where your project management methodology would benefit from enhancement and tighter integration with your other management processes. Leveraging the content of PM Solutions' Project Management Community of Practice (PM COP) methodology, PM Solutions' expert consultants come equipped with a toolkit of best practices to draw from, and tailor appropriate content to fit your desired project objectives and cultural threshold.

Methodology Deployment and Ongoing Support

Contact us to schedule a walk-through of our methodology development process, where we can share samples of templates, guidelines, and documentation that can be customized specifically for your environment.

*Results from the Value of Project Management research report conducted by PM Solutions.

What is the PM COPSM?

PM Solutions' Project Management Community of Practice (PM COP) is our proprietary methodology that supports the active use of repeatable processes across all projects. Developed over more than a decade, the PM COP contains hundreds of easy-to-follow forms, templates, practices, and guidelines that can be applied immediately by our expert consultants to improve project execution and operational efficiency for your organization.
