- » Project Cost and Schedule Management
- » Project Management Essentials
- » Project Risk Management

Introductory

- » **Agile Project Management**
Designed to provide IT professionals and project managers with an understanding of agile project management concepts.
- » **Comprehensive Microsoft® Project 2010**
Gain better control over projects by learning to effectively use Microsoft Project.
- » **Essentials of Microsoft® Project 2010**
Unleash the core functionality of Microsoft Project 2010 by learning to tailor the use of Project to the needs of the organization.
- » **Extreme PM – A Hands-On & Accelerated Approach to PM**
Four days of concentrated onsite training and hands-on learning designed to accelerate project management performance.
- » **How to Lead a Team**
Practical approaches to focus on the “soft skill” side of leading projects, in both face-to-face and virtual environments.
- » **Implementing Agile in a Waterfall World**
This foundation course encompasses what you need to know to put new Agile knowledge to use, and is complemented by hands-on exercises.
- » **Managing Projects with Microsoft® Project Server 2010**
Learn to use Microsoft Project 2010 in the Microsoft Project Server 2010 environment creating a truly collaborative project management information system.
- » **PRINCE2® Foundation**
Provides a detailed and practical understanding of the PRjects IN Controlled Environments (PRINCE) project management method.
- » **Project Management Basics**
Designed to provide project team members with the rudimentary knowledge and skills needed to support the project manager.
- » **Project Management Essentials**
PM College's flagship course covers the foundation of what every project manager needs to know to successfully manage a project including: initiating, planning, executing, monitoring and controlling, and closing.
- » **Project Management with Microsoft® Project 2010**
Improve schedule and cost performance of projects while improving profitability and customer satisfaction with Microsoft Project.

Proficient

- » **Complex Project Management**
Designed for experienced project managers who want to manage complex projects effectively.
- » **Critical Judgment**
How to design a “responsive” project, aggressively managing the triple constraints, and communicating with peers, team members, and senior leadership.
- » **Gathering Agile Requirements**
This course gives hands-on experience with techniques for gathering agile requirements.
- » **Intelligent Disobedience**
Preparation for successful interactions with senior management and to effectively manage politically charged projects.
- » **Leadership in High-Performance Teams**
Provides an engaging workplace simulation to breakthrough leadership insights and develop practical and critical skills.
- » **Managing by Project**
Designed specifically for those who must create projects from the ground up and then manage them.
- » **Managing Multiple Projects**
Techniques for identifying what constitutes an individual portfolio, establishing priorities, sharing resources across multiple projects, and managing day-to-day responsibilities.
- » **Managing Virtual Teams: Creating Collaborative Excellence from Afar**
Prepares participants to engage, energize, and execute with excellence in virtual team environments.
- » **PMP® Exam Review**
Participants will focus on key concepts, terms, and principles necessary for successfully passing the PMP® exam.
- » **Portfolio Planning and Management**
Develop an understanding of the principles of project portfolio management, the role of a portfolio manager in managing strategy and change, and the necessary steps to establishing and managing a portfolio of initiatives.
- » **PRINCE2 Foundation and Practitioner**
Provides a detailed, practical, and more in-depth understanding of the PRjects IN Controlled Environments (PRINCE) project management method.
- » **Vendor Relationship Management**
Preparation to effectively manage all aspects of vendor relationships, from selecting the right vendor, to getting the right results.

Development

- » **Agile Bootcamp**
Intended for teams at varying stages of Agile adoption who need an immersion session. All aspects of planning, from vision to daily planning, are covered.
- » **CAPM® Exam Review**
Designed for anyone preparing to sit for the CAPM® exam.
- » **How to Model, Analyze, and Improve Business Processes**
Business process analysis techniques, methods and tricks to help participants model, analyze and improve manual and automated business processes.
- » **Program Management Professional (PgMP®) Preparation**
Focused on core disciplines required to deliver strategic objectives, this course is designed to help participants achieve the PgMP® certification.
- » **Project Cost and Schedule Management**
Mastering the triple constraints of project management – scope, time, and cost – are the focus of this intensive course.
- » **Project Meetings with Purpose**
Learn meeting facilitation techniques that will lead to better outcomes and move your projects forward.
- » **Project Risk Management**
Identify, analyze, prioritize, and mitigate project risks while exploring response control.

Advanced

- » **Agile Project Management and PMI-ACP® Exam Prep**
Explore a wide range of Agile Project Management techniques while also preparing to sit for the PMI-ACP® exam.
- » **Benefits Realization: How to Demonstrate Tangible Value Against Your Business Case Promise**
Focus on real tools and proven practical concepts that will drive effective decision making and lead to benefit realization success.
- » **Critical Chain Project Management**
Analysis of some of the most common project schedule management problems, their causes, and proven techniques and tools to address those problems.
- » **Earned Value Concepts & Techniques**
Introduction to earned value concepts that are widely used and accepted as ways to plan and manage projects.
- » **The Evolving PMO: Governance, Portfolio Management, Resource Optimization, and Performance Measurement**
Learn how PMOs can evolve into highly valued enterprise assets, balancing strategy execution, governance, and resource demand.
- » **Managing Project Outcomes for Business Impact**
Identify how the project manager role is evolving into a business asset and learn how to build a business case that demonstrates project value.
- » **Managing Relationships for Project Success**
Learn to define, create, manage, and sustain effective relationships with key resources.
